

Department of Planning, Building and Code Enforcement

STEPHEN M. HAASE, AICP, DIRECTO

INITIAL STUDY

PROJECT FILE NO.: PDC04-053

PROJECT DESCRIPTION: Planned Development Rezoning from A(PD) Planned Development Zoning District to A(PD) Planned Development Zoning District and subsequent permits to allow demolition of the existing restaurant and construction of up to 5,500 square feet for commercial uses on a 0.46 gross acre site

PROJECT LOCATION: Southwest corner of Hedding St. and Coleman Ave. (879 Coleman Ave.)

GENERAL PLAN DESIGNATION: General Commercial ZONING: A(PD) Planned Development

SURROUNDING LAND USES: North: Commercial, South: Commercial, East: Commercial, West: Residential

PROJECT APPLICANT'S NAME AND ADDRESS: Pinn Brothers Construction, 1475 Saratoga Ave., Suite 250, San Jose, CA 95129

DETERMINATION

On the basis of this initial study:

П	I find the proposed project could not have a significant effect on the environment, and a NEGATIVE						
Ц	DECLARATION will be prepared.						
\boxtimes	I find that although the proposed project could have a significant effect on the environment, there will not be a significant effect in this case because the project proponent has agreed to revise the project to avoid any significant effect. A MITIGATED NEGATIVE DECLARATION will be prepared.						
	I find the proposed project could have a significant effect on the environment, and an ENVIRONMENTAL IMPACT REPORT(EIR) is required.						
	I find the proposed project could have a significant effect on the environment, but at least one effect has been (1) adequately analyzed in a previous document pursuant to applicable legal standards, and (2) addressed by mitigation measures based on the previous analysis as described in the attached initial study. An EIR is required that analyzes only the effects that were not adequately addressed in a previous document.						
	I find that although the proposed project could have a significant effect on the environment, no further environment analysis is required because all potentially significant effects have been (1) adequately analyzed in an earlier EIR of NEGATIVE DECLARATION pursuant to applicable standards, and (2) avoided or mitigated pursuant to that earlier EIR or NEGATIVE DECLARATION, including revisions or mitigation measures that are included in the project, and further analysis is not required.

File No. PDC04-053 - IS.doc Page No. 2					2		
Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	Information Sources		
I. AESTHETICS - Would the project:							
a) Have a substantial adverse effect on a scenic vista?					1,2		
b) Substantially damage scenic resources, including, but not limited to, trees, rock out-croppings, and historic buildings within a state scenic highway?					1,2		
c) Substantially degrade the existing visual character or quality of the site and its surroundings?			\boxtimes		1,2		
d) Create a new source of substantial light or glare that would adversely affect day or nighttime views in the area?					1,2		
e) Increase the amount of shade in public and private open space on adjacent sites?				\boxtimes	1,2		
FINDINGS: The proposed project would alter the existing visual character of including the demolition of the existing commercial restaurant at building. However, Architectural and site design, including colo design review by Planning staff to ensure the project will result it aesthetics.	the site arrs, materia	nd the construction als, and exterior	ction of a roor lighting,	new con	mmercial ndergo		
MITIGATION MEASURES: None. II. AGRICULTURE RESOURCES - Would the project	t :						
a) Convert Prime Farmland, Unique Farmland, or Farmland of Statewide Importance (Farmland), as shown on the maps prepared pursuant to the Farmland Mapping and Monitoring Program of the California Resources Agency, to non-agricultural use?					1,3,4		
b) Conflict with existing zoning for agricultural use, or a Williamson Act contract?					1,3,4		
c) Involve other changes in the existing environment which, due to their location or nature, could result in conversion of Farmland, to non-agricultural use?					1,3,4		
The project site is not located in an area identified as prime farmland, nor is the site being used for or zoned for agricultural use. Therefore, the proposed project will have no significant impacts on the City's or Region's agricultural resources. MITIGATION MEASURES: None.							
a) Conflict with or obstruct implementation of the applicable air quality plan?				\boxtimes	1,14		
b) Violate any air quality standard or contribute substantially to an existing or projected air quality violation?					1,14		

Issues	Potentially Significant Impact	Noutticant With	Less Than Significant Impact	No Impact	Information Sources
c) Result in a cumulatively considerable net increase of any criteria pollutant for which the project region is classified as non-attainment under an applicable federal or state ambient air quality standard (including releasing emissions that exceed quantitative thresholds for ozone precursors)?					1,14
d) Expose sensitive receptors to substantial pollutant concentrations?					1,14
e) Create objectionable odors affecting a substantial number of people?					1,14

FINDINGS:

The City of San Jose uses the threshold of significance established by the Bay Area Air Quality Management District (BAAQMD) to assess air quality impacts. Based on the BAAQMD threshold of significance, projects that generate fewer than 2,000 vehicle trips per day are not considered major air pollutant contributors and do not require a technical air quality study. As this project will generate approximately 220 vehicle trips per day, no air quality study was prepared for this project.

Temporary Air Quality impacts may result from demolition of the existing structure and other construction activities on the subject site. Implementation of the mitigation measures listed below will reduce the temporary construction impacts to a less than significant level.

MITIGATION MEASURES:

The following construction practices shall be implemented during all phases of construction for the proposed project.

- 1. Water all active construction areas at least twice daily or as often as needed to control dust emissions.
- 2. Cover all trucks hauling soil, sand, and other loose materials and/or ensure that all trucks hauling such materials maintain at least two feet of freeboard.
- 3. Pave, apply water three times daily, or apply (non-toxic) soil stabilizers on all unpaved access roads, parking areas and staging areas at construction sites.
- 4. Sweep daily or as often as needed with water sweepers all paved access roads, parking areas and staging areas at construction sites to control dust.
- 5. Sweep public streets daily, or as often as needed, with water sweepers, to keep streets free of visible soil material.
- 6. Hydroseed or apply (non-toxic) soil stabilizers to inactive construction areas (previously graded areas inactive for ten days or more).
- 7. Enclose, cover, water twice daily or apply non-toxic soil binders to exposed stockpiles (dirt, sand, etc.) sufficient to prevent visible airborne dust.
- 8. Limit traffic speeds on unpaved roads to 15 mph.
- 9. Install sandbags or other erosion control measures to prevent silt runoff to public roadways.
- 10. Replant vegetation in disturbed areas as quickly as possible.

BIOLOGICAL RESOURCES - Would the project:

ć	a) Have a substantial adverse effect, either directly or through habitat modifications, on any species identified as a candidate, sensitive, or				
	special status species in local or regional plans, policies, or		Ш	\boxtimes	1,10
	regulations, or by the California Department of Fish and Game or				
	U.S. Fish and Wildlife Service?				

b) Have a substantial adverse effect on any aquatic, wetland, or riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act including, but not limited to, marsh, vernal pool, coastal, etc., through direct removal, filling, hydrological interruption, or other means? d) Interfere substantially with the movement of any native resident or migratory fish or wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? The site is currently developed with an approximately 5,000 square-foot restaurant, approximately 10,200	1.01.0.12.00.000			•	uge 110.	•			
riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act including, but not limited to, marsh, vernal pool, coastal, etc., through direct removal, filling, hydrological interruption, or other means? d) Interfere substantially with the movement of any native resident or migratory wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? FINDINGS: The site is currently developed with an approximately 5,000 square-foot restaurant, approximately 10,200 square-feet of surface parking, and perimeter landscaping. The site is surrounded by urban development, the site is not used as habitat for rare or endangered plant or animal species. Burrowing owls from the nearby airport approach zone would not find suitable habitat on the existing site. No designated Heritage Trees exist at the site, and no trees would be removed as part of the proposed project.	Issues	Significant	Significant With Mitigation	Significant		Information Sources			
riparian habitat or other sensitive natural community identified in local or regional plans, policies, regulations, or by the California Department of Fish and Game or U.S. Fish and Wildlife Service? c) Have a substantial adverse effect on federally protected wetlands as defined by Section 404 of the Clean Water Act including, but not limited to, marsh, vernal pool, coastal, etc., through direct removal, filling, hydrological interruption, or other means? d) Interfere substantially with the movement of any native resident or migratory wildlife species or with established native resident or migratory wildlife corridors, or impede the use of native wildlife nursery sites? e) Conflict with any local policies or ordinances protecting biological resources, such as a tree preservation policy or ordinance? f) Conflict with the provisions of an adopted Habitat Conservation Plan, Natural Community Conservation Plan, or other approved local, regional, or state habitat conservation plan? 	MITIGATION MEASURES:								

None.

IV. CULTURAL RESOURCES - Would the project:

a) Cause a substantial adverse change in the significance of an historical resource as defined in CEQA Guidelines §15064.5?			1,7
b) Cause a substantial adverse change in the significance of an archaeological resource pursuant to CEQA Guidelines §15064.5?			1,8
c) Directly or indirectly destroy a unique paleontological resource or site, or unique geologic feature?			1,8
d) Disturb any human remains, including those interred outside of formal cemeteries?			1,8

FINDINGS:

Based on the City of San Jose's archeological resource maps, the site is not located in an area of archeological sensitivity. No archeological reports were required.

The existing restaurant building on the site was constructed circa 1975 and is not considered to be of historical significance.

Construction of the project would incorporate the following measures to address disturbance of human remains. As required by County ordinance, this project has incorporated the following guidelines. - Pursuant to Section 7050.5 of

Issues	Potentially Significant Impact	Cioniticant Math	Less Than Significant Impact	No Impact	Information Sources
--------	--------------------------------------	------------------	------------------------------------	--------------	------------------------

the Health and Safety Code, and Section 5097.94 of the Public Resources Code of the State of California in the event of the discovery of human remains during construction, there shall be no further excavation or disturbance of the site or any nearby area reasonably suspected to overlie adjacent remains. The Santa Clara County Coroner shall be notified and shall make a determination as to whether the remains are Native American. If the Coroner determines that the remains are not subject to his authority, he shall notify the Native American Heritage Commission who shall attempt to identify descendants of the deceased Native American. If no satisfactory agreement can be reached as to the disposition of the remains pursuant to this State law, then the land owner shall re-inter the human remains and items associated with Native American burials on the property in a location not subject to further subsurface disturbance.

MITIGATION MEASURES:

None.

V. GEOLOGY AND SOILS - Would the project:

a) Expose people or structures to potential substantial adverse effects, including the risk of loss, injury, or death involving:			
1) Rupture of a known earthquake fault, as described on the most recent Alquist-Priolo Earthquake Fault Zoning Map issued by the State Geologist for the area or based on other substantial evidence of a known fault? (Refer to Division of Mines and Geology Special Publication 42.)		\boxtimes	1,5,24
2) Strong seismic ground shaking?			1,5,24
3) Seismic-related ground failure, including liquefaction?	\boxtimes		1,5,24
4) Landslides?		\boxtimes	1,5,24
b) Result in substantial soil erosion or the loss of topsoil?		\boxtimes	1,5,24
c) Be located on a geologic unit or soil that is unstable, or that would become unstable as a result of the project, and potentially result in on- or off-site landslide, lateral spreading, subsidence, liquefaction or collapse?			1,5,24
d) Be located on expansive soil, as defined in Table 18-1-B of the Uniform Building Code (1994), creating substantial risks to life or property?			1,5,24
e) Have soils incapable of adequately supporting the use of septic tanks or alternative wastewater disposal systems where sewers are not available for the disposal of wastewater?			1,5,24

FINDINGS:

The project site is located within the seismically active San Francisco region, which requires that the building be designed and built in conformance with the requirements of the 1997 Uniform Building Code for Seismic Zone 4. As the project includes these required measures, the potential for seismic impacts will be less than significant.

MITIGATION MEASURES:

The Project site is within the State of California Seismic Hazard Zone. A soil investigation report addressing the potential hazard of liquefaction must be submitted to, reviewed and approved by the City Geologist prior to issuance of a grading permit or Public Works Clearance. The investigation should be consistent with the guidelines published by the State of California (CDMG Special Publication 117) and the Southern California

Issues	Potentially Significant Significant Mitigation Incorporated Less Than Significant Mitigation Incorporated Sources
--------	---

Earthquake Center ("SCEC" report). A recommended depth of 50 feet should be explored and evaluated in the investigation.

VI. HAZARDS AND HAZARDOUS MATERIALS - Would the project:

, -,	 r - J · ·		
a) Create a significant hazard to the public or the environment through the routine transport, use, or disposal of hazardous materials?	\boxtimes		1
b) Create a significant hazard to the public or the environment through reasonably foreseeable upset and accident conditions involving the release of hazardous materials into the environment?	\boxtimes		1
c) Emit hazardous emissions or handle hazardous or acutely hazardous materials, substances, or waste within one-quarter mile of an existing or proposed school?		\boxtimes	1
d) Be located on a site which is included on a list of hazardous materials sites compiled pursuant to Government Code Section 65962.5 and, as a result, would it create a significant hazard to the public or the environment?		\boxtimes	1,12
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project result in a safety hazard for people residing or working in the project area?		\boxtimes	1,2
f) For a project within the vicinity of a private airstrip, would the project result in a safety hazard for people residing or working in the project area?		\boxtimes	1
g) Impair implementation of, or physically interfere with, an adopted emergency response plan or emergency evacuation plan?		\boxtimes	1,2
h) Expose people or structures to a significant risk of loss, injury or death involving wildland fires, including where wildlands are adjacent to urbanized areas or where residences are intermixed with wildlands?		\boxtimes	1

FINDINGS:

Development of the proposed project will require the demolition of an existing restaurant building on the site, which may contain asbestos building materials and/or lead-based paint. In conformance with State and Local laws, a visual inspection/pre-demolition survey, and possible sampling, will be conducted prior to the demolition of the building to determine the presence of asbestos-containing materials and/or lead-based paint.

All potentially friable asbestos-containing materials shall be removed in accordance with National Emissions Standards for Hazardous Air Pollutants (NESHAP) guidelines prior to building demolition or renovation that may disturb the materials. All demolition activities will be undertaken in accordance with Cal/OSHA standards, contained in Title 8 of the California Code of Regulations (CCR), Section 1529, to protect workers from exposure to asbestos. Materials containing more than one percent asbestos are also subject to Bay Area Air Quality Management District (BAAQMD) regulations.

During demolition activities, all building materials containing lead-based paint shall be removed in accordance with Cal/OSHA Lead in Construction Standard, Title 8, California Code of Regulations 1532.1, including employees training, employee air monitoring and dust control. Any debris or soil containing lead-based paint or coatings will be disposed of at landfills that meet acceptance criteria for the waste being disposed.

Demolition done in conformance with these Federal, State and Local laws and regulations, will avoid significant exposure of construction workers and/or the public to asbestos and lead-based paint.

	Potentially Significant Impact	Cioniticant Math	Less Than Significant Impact	No Impact	Information Sources

MITIGATION MEASURES:

None.

VII.	HYDROLOGY	AND WATER	OUALITY -	Would the	project:
V 11.			OUMBIL -	vvouiu tiit	DIVICUL

a) Violate any water quality standards or waste discharge requirements?		\boxtimes	1,15
b) Substantially deplete groundwater supplies or interfere substantially with groundwater recharge such that there would be a net deficit in aquifer volume or a lowering of the local groundwater table level (e.g., the production rate of pre-existing nearby wells would drop to a level which would not support existing land uses or planned uses for which permits have been granted)?		\boxtimes	1
c) Substantially alter the existing drainage pattern of the site or area, including the alteration of the course of a stream or river, in a manner which would result in substantial erosion or siltation on-or off-site?		\boxtimes	1
d) Substantially alter the existing drainage pattern of the site or area, including through the alteration of the course of a stream or river, or substantially increase the rate or amount of surface runoff in a manner that would result in flooding on-or off-site?			1
e) Create or contribute runoff water which would exceed the capacity of existing or planned stormwater drainage systems or provide substantial additional sources of polluted runoff?		\boxtimes	1,17
f) Otherwise substantially degrade water quality?			1
g) Place housing within a 100-year flood hazard area as mapped on a Federal Flood Hazard Boundary or Flood Insurance Rate Map or other flood hazard delineation map?		\boxtimes	1,9
h) Place within a 100-year flood hazard area structures that would impede or redirect flood flows?		\boxtimes	1,9
i) Expose people or structures to a significant risk of loss, injury, or death involving flooding, including flooding as a result of the failure of a levee or dam?		\boxtimes	1
j) Be subject to inundation by seiche, tsunami, or mudflow?		\boxtimes	1

FINDINGS:

The proposed project is 0.46 acres in size. The site is currently covered with approximately 14,136 sq. ft. of impervious surface. Permeable pavement is proposed for all on-site pedestrian areas, thereby resulting in a net decrease in impervious surface compared to the existing conditions. The proposed project will reduce the existing impervious surface by approximately 186 sq. ft., for a total impervious surface of 13,950 sq. ft. Furthermore, disconnected downspouts will be utilized to drain rainwater through landscaped areas (where possible) in order to reduce storm water flow volume and velocity into the storm drain system. With the proposed mitigation measures, redevelopment of the project site is anticipated to result in a slight improvement in the water quality of runoff discharged to the storm water collection system. With the implementation of the proposed mitigation, the project's short-term water quality impacts during construction would not be significant.

IX. MINERAL RESOURCES - Would the project:				T	
a) Result in the loss of availability of a known mineral resource that would be of value to the region and the residents of the state?					1,2,23
b) Result in the loss of availability of a locally-important mineral					1,2,23

FINDINGS:

plan or other land use plan?

The project site is within a developed urban area. The project would not result in a significant impact from the loss of availability of a known mineral resource.

Issues	Potentially Significant With Significant Mitigation Incorporated Less Than Significant Impact Information Sources
--------	---

MITIGATION MEASURES:

None.

X. NOISE - Would the project result in:

2. NOISE - Would the project result in.			
a) Exposure of persons to, or generation of, noise levels in excess of standards established in the local general plan or noise ordinance, or applicable standards of other agencies?			1,2,13,18
b)Exposure of persons to, or generation of, excessive groundborne vibration or groundborne noise levels?			1
c) A substantial permanent increase in ambient noise levels in the project vicinity above levels existing without the project?			1
d)A substantial temporary or periodic increase in ambient noise levels in the project vicinity above levels existing without the project?	\boxtimes		1
e) For a project located within an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?			1
f) For a project within the vicinity of a private airstrip, would the project expose people residing or working in the project area to excessive noise levels?			1

FINDINGS:

The project site is located in close proximity to the San Jose International Airport (approximately 2,000 feet), therefore, the exterior environment will be subject to noise impacts from aircraft. The City's General Plan recognizes that "the attainment of exterior noise quality levels in the environs of the San Jose International Airport... and along major roadways may not be achieved." The site falls within the airport's 65 CNEL noise contour, and exterior noise levels from Hedding St. and Coleman Ave. are approximately 65 to 69 dB. While exterior noise levels cannot be managed, interior noise levels can. To reduce the interior noise level to the 45 DNL called for in the General Plan, special construction methods and materials need to be utilized. With standard construction techniques, the noise levels inside the projects units would be reduced by 15 dBA. In addition, this project will include mechanical ventilation, which will allow the windows to remain closed and will reduce the noise levels by 25 dBA.

Noise from the construction of the proposed project could potentially pose a significant impact to the surrounding residential properties. To limit the construction noise impacts on nearby properties, various mitigation measures have been incorporated into the proposal.

MITIGATION MEASURES:

- 1) Construction activities shall be limited to the hours of 7:00 a.m. to 7:00 p.m. Monday through Friday for any on-site or off-site work within 500 feet of any residential unit.
- 2) The contractor shall use "new technology" power construction equipment with state-of-the-art noise shielding and muffling devices. All internal combustion engines used on the project site shall be equipped with adequate mufflers and shall be in good mechanical condition to minimize noise created by faulty or poor maintained engines or other components.
- 3) Staging areas shall be located a minimum of 200 feet from noise sensitive receptors, such as residential uses.

File No. PDC04-053 - IS.doc	Page No. 10				0
Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	Information Sources
4) Weekend construction hours, including staging of vehicle limited to Saturdays between the hours of 9 a.m. to 5 p.m. Permit within the interior of enclosed building structures provided that s residential uses. Exterior generators, water pumps, compressors shall be responsible for educating all contractors and subcontract regulation pertaining to all construction activities and limitations telephone number of a developer appointed disturbance coordinatentrance to the job site. XII. PUBLIC SERVICES - Would the project:				1	
a) Result in substantial adverse physical impacts associated with the provision of new or physically altered governmental facilities, the need for new or physically altered governmental facilities, the construction of which could cause significant environmental impacts, in order to maintain acceptable service ratios, response times or other performance objectives for any of the public services:					
Fire Protection?					1,2
Police Protection? Schools?					1,2
Parks?					1,2
Other Public Facilities?					1,2

FINDINGS:

The project site is located in an urbanized area of San Jose, and well served by existing Fire, Police, School, Park and other Public Facilities. No additional Fire or Police personnel or equipment are necessary to serve the proposed project.

File No. PDC04-053 - IS.doc Page No. 11 Less Than Potentially Less Than Significant With No Information Issues Significant Significant Mitigation Impact Sources **Impact** Impact Incorporated MITIGATION MEASURES: None. XIII. RECREATION a) Would the project increase the use of existing neighborhood and \bowtie 1,2 regional parks or other recreational facilities such that substantial physical deterioration of the facility would occur or be accelerated? b) Does the project include recreational facilities or require the \boxtimes construction or expansion of recreational facilities that might have 1,2 an adverse physical effect on the environment? FINDINGS: The project will not increase the use of existing neighborhood and regional parks or other recreational facilities. The project will not include recreational facilities, nor will it require the construction or expansion of recreational facilities that might have an adverse physical effect on the environment. MITIGATION MEASURES: None. XIV. TRANSPORTATION / TRAFFIC - Would the project: a) Cause an increase in traffic which is substantial in relation to the existing traffic load and capacity of the street system (i.e., result in a П П \boxtimes 1,2,19 substantial increase in either the number of vehicle trips, the volume to capacity ratio of roads, or congestion at intersections)? b) Exceed, either individually or cumulatively, a level of service \boxtimes 1,2,19 standard established by the county congestion management agency for designated roads or highways? c) Result in a change in air traffic patterns, including either an increase X 1,19 in traffic levels or a change in location that results in substantial safety risks? d) Substantially increase hazards due to a design feature (e.g., sharp \boxtimes 1.19 curves or dangerous intersections) or incompatible land uses (e.g., farm equipment)? e) Result in inadequate emergency access? X 1,20 f) Result in inadequate parking capacity? \boxtimes 1.18 g) Conflict with adopted policies, plans, or programs supporting \boxtimes 1,2,18 alternative transportation (e.g., bus turnouts, bicycle racks)?

FINDINGS:

The new 5,500 square-foot commercial building would result in approximately 220 daily vehicle trips to the site. This does not represent a significant increase over the current traffic volume from the existing 5,000 square-foot restaurant at the site. The Department of Public Works reviewed the project and determined that no Transportation Impact Analysis was required because the total increase in traffic volume is considered negligible.

MITIGATION MEASURES:

None.

Issues	Potentially Significant Impact	Less Than Significant With Mitigation Incorporated	Less Than Significant Impact	No Impact	Information Sources
XV. UTILITIES AND SERVICE SYSTEMS - Would	the pro	ject:			
a) Exceed wastewater treatment requirements of the applicable Regional Water Quality Control Board?					1,15
b) Require or result in the construction of new water or wastewater treatment facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?					1,2,21
c) Require or result in the construction of new stormwater drainage facilities or expansion of existing facilities, the construction of which could cause significant environmental effects?					1,17
d) Have sufficient water supplies available to serve the project from existing entitlements and resources, or are new or expanded entitlements needed?					1,22
e) Result in a determination by the wastewater treatment provider which serves or may serve the project that it has adequate capacity to serve the project's projected demand in addition to the provider's existing commitments?					1,21
f) Be served by a landfill with sufficient permitted capacity to accommodate the project's solid waste disposal needs?				\boxtimes	1,21
g) Comply with federal, state, and local statutes and regulations related to solid waste?					1,21
FINDINGS:					
MITIGATION MEASURES:					
None.					
XVI. MANDATORY FINDINGS OF SIGNIFICANCI	T.				
a) Does the project have the potential to (1) degrade the quality of the environment, (2) substantially reduce the habitat of a fish or wildlife species, (3) cause a fish or wildlife population to drop below self-sustaining levels, (4) threaten to eliminate a plant or animal community, (5) reduce the number or restrict the range of a rare or endangered plant or animal, or (6) eliminate important examples of the major periods of California history or prehistory?					1,10
b) Does the project have impacts that are individually limited, but cumulatively considerable? "Cumulatively considerable" means that the incremental effects of a project are considerable when viewed in connection with the effects of past projects and the effects of other current projects.					1,16
c) Does the project have environmental effects which will cause substantial adverse effects on human beings, either directly or indirectly?					1

Page No. 12

FINDINGS:

File No. PDC04-053 - IS.doc

As discussed in the previous sections, the proposed project would have no significant environmental effects with respect to agriculture, biological resources, cultural resources, land use and planning, mineral resources, population and housing, public services, recreation, and utilities and service systems. As discussed in the previous sections, the proposed project would have less than significant environmental effects (or less than significant environmental effects with mitigation incorporated) with respect to aesthetics, geology and soils, hazardous materials, hydrology, water

--------	--	--

quality, noise, and transportation. The project would not have "cumulatively considerable" environmental effects in that the net increase in traffic and decrease in air quality would be negligible given the existing 5,000 square-foot restaurant at the site and the proposed 5,500 square-foot commercial building. The noise impacts from the adjacent road and nearby airport have the potential to cause adverse effects to human health, however, with incorporation of the mitigation measures noted above, the project will not result in significant adverse effects.

MITIGATION MEASURES:

None.
